

MFA-AS-A-SERVICE

"Protect your identity, strengthen your security with MFA-as-a-Service."

MFA (Multi-Factor Authentication) as a Service is a cloud-based service that provides additional security for user authentication by requiring multiple methods of verification, such as a password and a security token/OTP/Notification. This service is offered by Change Frontier to simplify the deployment and management of MFA for their customers.

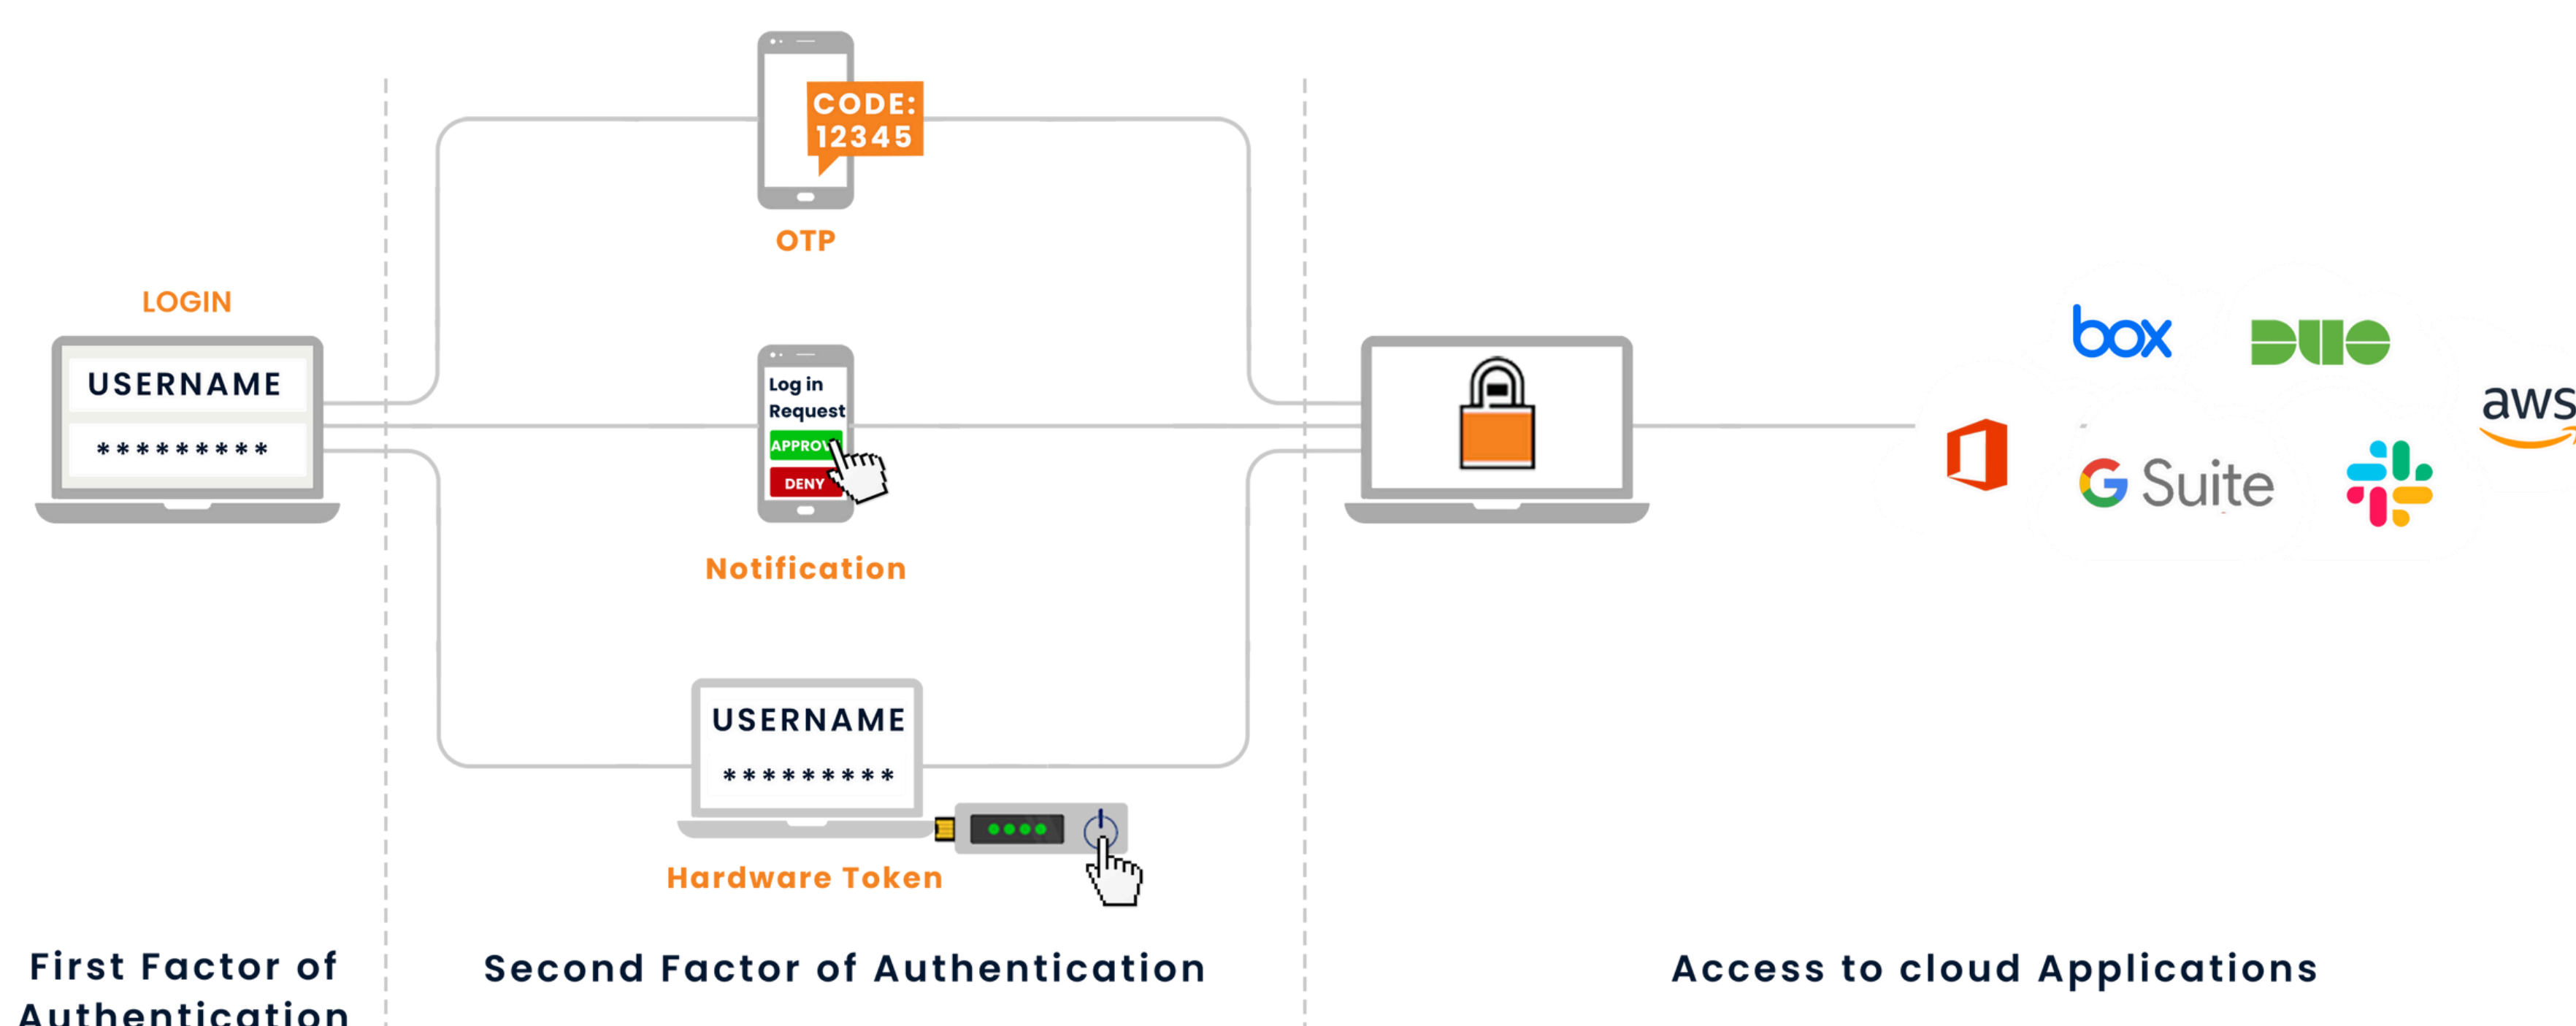

DO YOU KNOW?

- MFA can reduce the risk of a data breach by 99.9% compared to using only a password.
- MFA can reduce the risk of a successful cyberattack by over 80%.
- Companies that implement MFA experience a decrease in successful phishing attacks by over 90%.

BENEFITS OF OUTSOURCING MFA-AS-A-SERVICE

- **Enhanced security:** Adds a second layer of authentication, making it harder for attackers to access sensitive information.
- **Easy implementation:** MFA as a Service can be quickly and easily added to existing authentication systems, reducing implementation time and costs.
- **Scalability:** The service can be scaled up or down to meet changing security requirements.
- **User convenience:** MFA can be delivered through various methods, including mobile apps, SMS messages, and security keys, providing a convenient experience for users.
- **Reduced costs:** Outsourcing MFA eliminates the need to invest in solutions and infrastructure, reducing overall costs.
- **Improved compliance:** MFA can help organizations meet regulatory requirements for secure authentication.

HOW MFA-AS-A-SERVICE WORKS

BENEFITS OF MFA-AS-A-SERVICE

- **Expertise:** Service providers have specialized knowledge and experience in MFA, providing a higher level of security.
- **Cost-effectiveness:** Outsourcing eliminates the need for in-house infrastructure and personnel, reducing costs.
- **Scalability:** Service providers can easily scale the MFA solution to meet changing business needs.
- **Focus on core business:** Outsourcing allows organizations to focus on their core business and leave the management of MFA to the experts.
- **Reliability:** Service providers have established processes and systems to ensure uptime and reliability.
- **Time-Saving:** Outsourcing eliminates the need for internal IT staff to manage and maintain the MFA solution, freeing up time for other tasks.
- **Improved security:** Service providers can provide the latest MFA technology, keeping organizations more secure than relying on in-house solutions.
