

CYBERSECURITY AWARENESS-AS-A-SERVICE

85 percent of all successful data breaches in 2020 involved the human element.

Every organization's first line of defense against cyber threats is its employees, but unfortunately, they're also the weakest security link. To protect your business from cyber attacks, your employees must be equipped with the knowledge and skills to recognize cybersecurity risks such as phishing scams, password hacks, trained to respond and share information appropriately. Rigorous cybersecurity awareness training is the key to turning this human weakness into a strength. The first step towards a more secure business is always cybersecurity awareness. It's self-explanatory – employees can't avoid phishing attempts if they don't know what one looks like. Effective cybersecurity awareness training keeps all employees up-to-date on cyber threats and how to handle them. Employees can adopt best practices across all platforms by providing proactive cybersecurity training, minimizing the risk of a successful cyber attack.

DO YOU KNOW?

- **Human error is the cause of 95% of cybersecurity incidents.**
- **59% of employees reuse passwords across multiple accounts.**
- **23% of users click on phishing emails.**

VULNERABILITY MANAGEMENT, DETECTION, AND REMEDIATION

Behavior-Driven Security Awareness

Security awareness training is tailored to individual employees based on their specific behaviors. We offer a selection of over 15,000 highly realistic phishing messages that are spread out over time during working hours. Each employee receives a unique phishing email at a different time, ensuring a comprehensive and effective training program.

Security Awareness Training

Invest in your organization's strongest line of defense by providing employee behavior-driven security awareness training. Training program features extensive courses, videos, and quizzes to reinforce good security practices and enhance employee knowledge.

Spear Phishing Simulation

Phishing simulation service offers tailored attacks with industry-specific templates to increase the chances of success. You can create a convincing phishing email with customizable templates, landing pages, and simulated attachments. You can even spoof your domain and track replies to monitor success with simulated CEO fraud attacks.

Reporting

Gain insights into your organization's ROI with enterprise-level reporting that provides a comprehensive 360-degree view. Reporting features provide detailed information on security awareness training and phishing simulations, with easy-to-digest reports tailored for the company's management & stakeholders.

Advanced Security Layer

An advanced security layer can be built within an organization by utilizing the first line of defense - Employees. Cybersecurity awareness training effectively reduces staff susceptibility to phishing attempts by up to 92%. It's important to use industry benchmarks to compare your security awareness proficiency and culture scores with other industry best standards to ensure that your organization's security awareness program is up-to-date.

Cyber Knowledge Assessments

Cyber knowledge assessments allow companies to evaluate an organization's adherence to key security and compliance best practices. By identifying user, group, and organizational risk, assessments provide data-driven insights to make informed decisions about your security awareness plan.

WHY CYBERSECURITY AWARENESS

Cybersecurity Awareness is a Continuous behavior modeling process covering topics and practices, including:

- Basic cyber hygiene
- Social engineering threats you
- Threat recognition and response
- Attack simulations
- Review of security guidelines and policies
- Personal responsibilities in corporate cybersecurity

Develop a culture of awareness to encourage employees to make good choices online

- Learn about risks like phishing and business email compromise.
- Awareness of current threats and types of social engineering attacks
- Content tailored to the needs of the specific country, region, role, and responsibilities.

Maintain compliance with these regulations

- HIPAA
- GDPR
- PCI DSS
- FISMA
- And many more

Highly experienced phishing team

- Guidance from industry experts
- Dedicated and skilled team

Stay Updated

- Detect emerging and evolving simulation techniques
- Mitigate zero-day vulnerabilities
- Make cyber champion workforce
